

Naeem Dev

Full-Stack Engineer

Karachi, Pakistan | Naeemansari.engineer@gmail.com | 0346-3162099

SUMMARY

Full-stack developer with 6+ years of experience building products end to end — from schema design to shipped UI. Comfortable with distributed systems, developer tooling, and fast, maintainable interfaces. Focused on readable code and quick feedback loops over theoretical perfection.

SKILLS

JavaScript / TypeScript · React / Next.js · Node.js / Express · Python · PostgreSQL / Redis · Docker / AWS · GraphQL / REST · Rust (learning)

EXPERIENCE

Senior Full-Stack Engineer — Northwind Labs 2023 – Present

Led migration from monolith to modular services; cut p95 API latency by 43%. Mentored two junior engineers.

Full-Stack Developer — Vantage Systems 2021 – 2023

Built the customer-facing dashboard from scratch; shipped weekly for two years with zero major rollbacks.

Backend Developer — Fieldstone Co. 2019 – 2021

Designed the core billing service handling 200k+ transactions monthly.

EDUCATION

B.S. Computer Science 2015 – 2019

State University — focused on distributed systems and algorithms. Graduated with honors.

PROJECTS

Pulse — Real-time analytics dashboard streaming 40k+ events/sec with sub-100ms visual updates.

Ledger — Expense-tracking API with double-entry accounting logic and automated reconciliation.

Nimbus — Serverless image-processing pipeline handling resize, compression, and CDN routing.

Cipher — End-to-end encrypted chat with forward secrecy, built to learn Rust's async ecosystem.
